8.5x11”

Digital Files

PDF is our preferred file format. If native files are supplied, only InDesign, Photoshop and Illustrator are acceptable. If supplying native files, please supply all links and fonts used in the document. If there are any problems, we will contact you and work to resolve them (with applicable charges). To minimize problems please read all guidelines carefully.

Images & Text

Color: All images must be CMYK or Grayscale only (no RGB or spot colors). Convert all spot colors to CMYK.

Resolution: 300 dpi

Image Manipulation: All scaling, rotating or other image manipulation must be done prior to placement in the page layout program. Note: enlarging an image with a resolution of 300 dpi over 125% in the page layout file will lower the effective resolution to the point that image quality degradation may be noticeable when printed.

Text Color: Text containing thin lines, serifs or small lettering should be restricted to one color.

Black Text & Logos: Set to overprint so they do not knock out when printed over a background, which may result in poor quality. Large black design elements, such as bars or backgrounds, should be a rich black (50C/30M/30Y/100K).

Submit Files

Please submit print-ready files and preferred ad placement options to:
